

VIRTUAL COMMUNICATION TRAINING

Sparking effective communication

Leaders have to communicate with a variety of people at all levels of an organization and in all aspects of their life. This program helps individuals develop the tools and techniques they need to increase their connections with others and communicate more clearly, concisely and confidently.

Rooted In Results

Open and effective communication is an integral part of building strong personal and professional relationships, but we know how easy it is for communications to go awry. This program will help participants improve their communications, identify communication gaps, and build new skills to spark successful and positive communications. By mastering these skills, individuals will see an immediate impact in increased productivity, engagement at work and job satisfaction. With every program we deliver, we believe in measurable results and are committed to maximizing our clients' investments.

Even though **89%** of people believe that effective communication is extremely important...

8 out of **10** people rate their own business's communication as either average or poor.

Our Approach

Our programs incorporate a variety of techniques to maximize participant engagement. We use group-led discussions, Socratic methods, instructional videos and role-playing throughout our training. We promote collaboration among learners by integrating real-life workplace challenges and problems.
